Therefore, Jesus' promise of deliverance for all people, combined with the images of The Sermon on the Mount, was nurtured by African-Americans. Chances are good, it has become the inspiration for the stirring spiritual, Go, Tell it on the mountain. Although its author is unknown, it is assumed that the hymn originated in the early 1800s. Go, Tell It Up the Mountain is popular in 1879 when performed by the Jubilee Singers of Fisk University, a school once specialized in educating freed slaves. 1. Many terms are used to refer to the top of a mountain, including cap, crest, mountaintop, peak, highlighter and summit. The highest mountain peak in the world is Mount Everest in the Himalayas. The upper reaches of a mountain typically consist of bare rock and snow, even in tropical climates. Mountain peaks receive a greater amount of precipitation than low-lying areas due to the cooler air found at higher altitudes. Cold air can't carry as much moisture, leading to more frequent rainfall. The cold temperatures also prevent the snow found at the mountaintop from melting. William Manning/Getty Images If you missed California's Instagram-famous wildflower super bloom that caused a massive town-closing frenzy in March (yes, it was so serious), you have another chance to see a phenomenon just like that. There's only one catch: you may have to step up to get there (this one's up in the mountains). Throughout California's hikes at Mammoth Lakes in the Sierra Nevada Mountains, such as the Agnew Meadows Wildflower Loop and the Mammoth Mountain Route, crazy beautiful flowers are expected to bloom as soon as the weather gets even hotter. The state's far lesser-known wildflower superblom will happen sometime around mid-July and August, so plan your trip accordingly — and far ahead. This content is imported from Instagram. Relatively cool temperatures through March appear to be slowing rise of plants so far, but when it starts to warm, it should be green pretty quickly, Blake Engelhardt, forest botanist at Inyo National Forest, told Travel + Leisure. With so much snow above 8,000 feet, peak wildflowers at the higher elevations may not be until the end of July or early August when they are deforested. Because winter was littered with heavy snow, these years of elevated superflower arrive a little later than usual — but don't worry, the flowers are coming. There are even guided wildflower tours in other areas of the Sierra Nevada Mountains, such as the Big Bear region, so you can optimize all your flower-watching goals.
